

From Santa Maria de Besora to La Farga de Bebié

The stretch that joins Santa Maria de Besora with la Farga de Bebié, is short, not too demanding and characterised by being downhill. Here we again meet up with the Ter river. The beauty of this stage comes from the buildings; first Besora castle which dates back to the ninth century, though unfortunately it is in ruins, and then the Romanesque church of Santa Maria.

Technical data

Length of walk: 8.309m
Maximum altitude: 957m
Minimum altitude: 578m
Maximum elevation: 330m
Ascent - Descent Gradient: -246m
