

From the Monastery of Montserrat to

The walk as you set out from the Monastery of Montserrat is really splendid, not only because the monastery is located in the heart of the Nature Reserve of the same name but also because the starting out point is high up and therefore the path leading us off is downhill. Although the landscape is quite dry, and sometimes too urbanized, the arrival into Manresa on foot is stunningly beautiful, and brings together two fundamental names of these lands. There is also the possibility of continuing the walk by going on along the stage to Navarcles, something which calls for more effort, and yet is a greater achievement at the same time.

Technical data

Length of walk: 20.530m

Maximum altitude: 761m

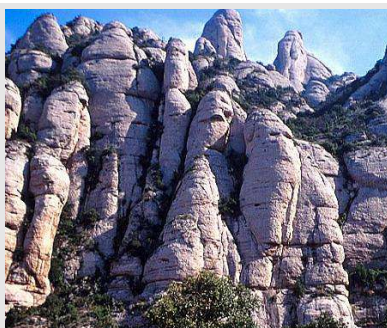

Minimum altitude: 202m

Maximum elevation: 602m

Ascent - Descent Gradient: -513m
