

## De Vilanova de Sau à Tavertet

The way from Vilanova de Sau to Tavertet is extraordinarily beautiful as it gives you two vantage points over a very special landscape. On one hand when you cross the valley you will be surprised by the rock crag separating the Collsacabra from les Guilleries, as if it were a great natural monument. The other view is after a typical mountain climb up the rocky ascent, and you will be able to admire from the top of this monument the valley and the Sau reservoir in the heart of the county. Finally the village of Tavertet leaves nobody indifferent.
