

From Sant Pere de Torelló to Santa Maria de Besora

This stage is mountainous, with a lot of steep ups and downs. The ascent to the Sanctuary of Bellmunt is a classic hike, both for the beauty of the landscape and also for its progression through the mountains and then the path climbs upwards. The views it offers from its heights are a sheer privilege: Montserrat, Turó de l'home, Puigmal, and the plana de Vic shrouded in fog in winter. The descent to Bisaura, over very special terrain, is through a splendid shadowy valley with a waterfall at the end. What more could we ask for?

Technical data

Length of walk: 11.513m

Maximum altitude: 1.212m

Minimum altitude: 610m

Maximum elevation: 842m

Ascent - Descent Gradient: 251m

Notes:
