

## From la Farga de Bebié to Ripoll

This stage is from the textile colony of la Farga de Bebié to the “Comtal Vila” (the Count’s town) of Ripoll, the cradle of inland Catalonia. It is a path without complications, joining together two counties united by the Ter river. Following the river it opens up our way through the sierra dels Bufadors and the sierra de Sovelles, two landscapes full of mushrooms and still preserving real countryside traditions. It is a complete excursion which offers us an exquisite finale: the monastery of Santa Maria in Ripoll.

### Technical data
